Work Experience

Software Engineer | Hybrid Enterprises, LLC | Saint Cloud, FL

May 2025- Present

- Builds software solutions for the Department of Veterans Affairs using Java, Struts, MySQL, REST API, Git
- Developed a tool for in-house developers to streamline development process during first 90 days
- Presents completed solutions to customers and answers questions during live demos every week
- Resolves end user tickets relating to developed software through direct communication and testing
- Follows Agile methodology to manage software development cycle at all stages
- Creates documentation for testing and using proprietary software

Research Assistant | Hydride Laboratory | Orlando, FL

May 2023 - May 2025

- Performed exploratory data analysis and pre-processing on colorimetry datasets to detect volatile organic compounds (VOCs) through liquid chromatography
- Used automated hierarchical clustering and principal component analysis to analyze colorimetric data to get a success rate of 80% or higher correct VOC identification from camera input provided by a Raspberry Pi
- Communicated weekly progress in standup with other lab members

Projects

Automated Scorecard Reader and Calculator, Frontend UI/UX

Javascript, Tailwind CSS, React, Jest

August 2024 - Present

Collaborates with five other students to make an application that uses optical character recognition (OCR) to score for a local equestrian association with a phone camera. Personal focus on UX/UI design and accessibility through React and TailwindCSS with unit testing through Jest. Ensures the final product meets client expectations through product owner role.

Contact Manager Project, Project Manager

HTML, CSS, Javascript, Bootstrap

August - November 2023

Served as a point of contact between end users and the development team, and kept the team on task through use of Trello and Agile methodology. Created and deployed a LAMP stack web application with create, read, update, and delete operations with login and registration. Personal focus on frontend development through Bootstrap with emphasis on mobile-first responsive design, as well as stepping in to resolve blockers.

Education

University of Central Florida | Orlando, FL

May 2025

Bachelor of Science in Computer Science

Activities and Honors:

Burnett Honors Scholar

Pegasus Gold Recipient

Coursework: Processes for Object-Oriented Software Development, Machine Learning Algorithms, Introduction to Technical Writing, Senior Design I & II
